

Greetings... and thanks for helping us with our own vintage American motorcycle restoration projects. We hope this manual will assist you with yours.

Our personal recommendation is to take this CD to your local office supply store and have a paper copy printed out for use on your work bench. Then save a format copy on your computer & store the original CD in a safe place. I have found that this is also a nice way to carry your manuals on road trips.

(not shown)

- 99750-77 16 oz. aerosol
- 99751-76 1 gal. can
- 99756-77 1 qt. squirt can

H. GAS GOLF CAR 2 CYCLE LUBRICANT

The answer to top performance and longer engine life is the consistent use of Harley-Davidson lubricant.

Harley-Davidson Golf Car Lubricant is developed around an ashless, high-performance additive system. The additives and base oil minimize two-cycle port plugging, combustion chamber deposits, piston varnish, spark plug fouling, and pre-ignition. Almost smokeless.

In addition to being a superior lubricant, it is economical to use in that you mix it in a ratio of 1% ounces per gallon of gasoline.

- 99803-76V One gal. plastic bottle
- 99810-76V 55 gal. drum

ELECTRIC CAR DIFFERENTIAL LUBRICANT

This is a lightweight, high efficiency, differential lubricant with long wear, extra pressure additives. It is specifically formulated for use in Harley-Davidson Electric Golf Car differentials. It provides proper lubrication and improved differential efficiency especially at low temperatures. For electric cars this means increased distance per battery charge. One quart used per car differential. (not shown)

- 99805-73 One quart differential lubr.

GAS GOLF CAR TRANSMISSION/ DIFFERENTIAL LUBRICANT

- 99890-81 12 oz. can (not shown)
